JANUARY 2012

## Peaceful Journey

Utter bliss! That is really all I need to say about this latest release from Syversen. Complete and utter bliss! A bubble bath for the soul!

His work is definitely of the rare, with his amazing talent in combining and utilizing mostly classical instruments to create a deep rich and soothing sound which moves you gently from the richly classical thorough to the slightly flavoured, just a hint of jazz, then once again back into the sounds of pure poetry. Female vocalisation has been used as an instrument adding that richness of texture and depth of feeling to several of the pieces.

Rich, enjoyable, deep and delicious this is one to be played in the evenings or before retiring for the night. Guaranteed to give a deep relaxing sleep and enhance inner peace.
