PEACEFUL JOURNEY

Tron Syversen: Peaceful Journey 28/01/2012

With this CD you can travel to a state of peace and total relaxation. With a symphonic sound which exists from voice, guitar, piano, keyboards, flute, horn, violin and cello, you can let yourself meditate in a gentle and melodic manner. Tron, who come from Norway, became one of the leading musicians of New Age music throughout the area of Scandinavia. Already he has spent fifteen years leading the way. With his CD 'Piano Poems' he attracted worldwide attention. The beautiful wordless singing voice is originating from Elin Trokken. Tron wanted to use his improvisation brio as a jazz bandsman to understand how music influences our mental and physical health. His inspiration ended up coming from nature, poetry, paintings, saints and places. Making the CD lasted two years. If you sleep more quietly and better with this music, or feel better in your life, then Tron has succeeded with his intention. Beautiful music for healing and relaxing.

-- Patrick Wiele (3 up to 4)
