Keyboardist Tron Syversen is back with PEACEFUL JOURNEY. On this recording he continues his march to the forefront of the new age music field. His sound encompasses the best of traditional, classic new age music with his piano and keyboards backed by wordless vocalizing and top European musicians on acoustic guitar, violin, cello, flute and English horn.

In the past 15 years, Tron Syversen, who is from Norway, first became one of the leading new age musicians from Scandinavia and then from all of Europe. With the worldwide release of his last album, PIANO POEMS, he received sales, acclaim and airplay internationally, and that CD went to #6 on the prestigious Zone Music Reporter Top 100 chart.

This is beautiful music, good for listening and for setting the mood at get-togethers and dinner parties, but also helpful for relaxing and healing.
