TRON SYVERSEN OFFERS PIANO, SYNTH AND GREAT WORDLESS VOCALIZING

**Tags:** syversen, piano, synth

Pianist and synthesist TRON SYVERSEN may be one of the top European new age artists, but he is willing to share the spotlight on his albums with other musicians, and he is well-known for always utilizing superb female singers to do wordless vocals. On his latest CD, PEACEFUL JOURNEY, Tron works with Elin Lokken who provides some of the loveliest wordless vocalizing in current new age music. She appears on seven of the nine tracks.

Syversen, who is equally adept on piano and synthesizer, also shares the musical duties with some of the musicians who back the group Secret Garden (playing guitars, English horn, flute, violin and cello).

Tron (cool name) may start these compositions by improvising, but by the time they are recorded with the other players, the music seems arranged and worked out. Although some of the melodies seem a bit ambient, for the most part the music is very melodic and enjoyable. If you like new age music, this is one you should definitely check out at Tron (dot)music website.

Enjoy the journey.
