TRON  
SYVERSEN

PEACEFUL JOURNEY  
music for relaxation and wellbeing

**Tron Syversen – PEACEFUL JOURNEY:** In these often-troubled times, this is the kind of music a person needs to listen to... soothing, yet full of life and energy! One of the tunes I particularly enjoyed was "Rivers"... as the title implies – something that flows! Tron's from Norway, where I imagine he sees (more than) a few sunsets such as those you see pictured on the CD jacket, so it seems only natural to my ears that he would have a firm handle on pieces like "The Beginning." If we could find a few more folks (like Tron) who are able to put their emotions into *action*, instead of those (like politicians) who use their words to paint pictures that seem "right", but are rather masks for their greed and avarice, this world would truly be a better place for us all. I believe Tron's music should be piped into grade-schools 'round the world, in an effort to reverse the disastrous trends we see (and hear) 'round us today. I give Tron a MOST HIGHLY RECOMMENDED, particularly for listeners who understand that music (like this) is a key ingredient in realizing our better selves. "EQ" (energy quotient) rating is 4.97. Get more information at [Tron's page for this CD.](#)
